

# INTRODUCTION

Your 3-year-old is transitioning from being a toddler to a preschooler. There is a lot to expect as the transition happens. Five key developments during this transition are as follows:

1. Physical development
  2. Emotional development
  3. Social development
  4. Cognitive development
  5. Language development
- Our Goal is to cover all these areas in order to build the right foundation.
  - Our Pre School recognizes a child's need to touch, talk, listen, and move while learning at an early age.
  - Curriculum includes reading, writing, science, social studies and math. Activities in art, culture, and imaginative play are part of the program.
  - Arabic, Quran and Islamic Values are integrated into the curriculum.
- 

# Introduction

In Minhal's preschool program, children will be offered extensive opportunities to explore and to discover, to question and to experiment. One of its goals will be to instill curiosity and a passion for learning. Each classroom will be equipped with learning centers in subjects such as art, language, sensorial, math, science, dramatic play, STEM activities and practical life skills. The materials will be carefully chosen to help the children to understand the concepts of size, measurement, quantity, weight, language, and many other scientific concepts. The School will also offer active exploration of paint using various mediums such as oil and pastels, water, and clay. The classroom and routines will be carefully planned to provide safety and predictability. The preschool curriculum goals are as follows:

- Language/writing and pre-reading English and Arabic
  - Quran Memorization
  - Mathematics
  - Social studies
  - Science
  - Art/construction
  - Fine motor skills
  - Life skills
  - Self care/environment care
  - Inclusion
-
